I certify that the above information is true. I further certify that these environmental claims for recycled content regarding these products are consistent with the Federal Trade Commission's Environmental Marketing Guidelines in accordance with PCC 12404.

These guidelines are available at: <http://www.ftc.gov/bcp/prop/rules/guides980427.htm>.

Postconsumer material comes from products that were bought by consumers, used, and recycled.

Secondary material consists of fragments of finished products of a manufacturing process.

Virgin material is that portion of the product made from new or non-recycled material. The material is neither secondary nor postconsumer.
